

Understanding RACF

duration: 1 day

This one-day course is the ideal introduction to IBM's RACF, and is suitable for all technicians, administrators, support personnel and managers who will come across RACF in their daily work.

It is also an ideal introduction to RACF for Systems Programmers and those training to be RACF Administrators. The course clearly explains the concepts and terminology of RACF, and introduces all the major RACF commands.

contents

Introduction to RACF

Planning for RACF

- RACF Group Structure
- Defining Users to RACF
- Defining Datasets to RACF
- Defining General Resources
- Maintenance & Housekeeping
